

1. Download IEDigest from <https://aka.ms/iedigest>
2. Run IEDigest exe and you will get an option to *Create Report*
3. Click on it. This will generate a folder on Desktop by the name IEDigest, which will contain all the necessary files

<Note for Engineer>

This utility gives us the data about Internet Explorer only. So, it might not give us the expected results if the issue is happening with Edge.
